The total volume of poultry products in Aurora decreased to 229.19 metric tons in Fourth Quarter 2024 from 230.71 metric tons in Fourth Quarter 2023 or by 0.66 percent decline. Moreover, Tarlac registered the highest growth rate at 8.84 percent while Zambales recorded the biggest decrease at 10.39 percent change. As a result, the total poultry production in Central Luzon registered a 0.40 percent drop. (Table 1)

Table 1. Volume of Poultry Production by Province in Central Luzon, Fourth Quarter 2024

Province	Volume of Production		Percent Change
	Q4 2024	Q4 2023	
CENTRAL LUZON	230,575.81	231,493.37	-0.40%
Tarlac	50,636.87	46,524.45	8.84%
Bataan	14,164.15	13,130.31	7.87%
Bulacan	74,387.82	72,818.09	2.16%
Aurora	229.19	230.71	-0.66%
Pampanga	52,396.81	56,375.21	-7.06%
Nueva Ecija	29,665.66	32,264.68	-8.06%
Zambales	9,095.32	10,149.91	-10.39%

The total poultry production in Aurora was comprised of all poultry products such as chicken, chicken egg, duck and duck eggs. Among these poultry products, chicken egg contributed 63.30 percent of the total volume of poultry production on the Fourth Quarter of 2024. Meanwhile, duck egg had the least share in the volume of production with 7.34 percent share. (Figure 3)

Figure 3. Percentage Share of Volume production by Poultry Products in Aurora: Fourth Quarter 2024

TECHNICAL NOTES

The Livestock and Poultry Performance Report presents an overview of the performance trends in terms of inventory for carabao, cattle, goat, swine, and various types of chickens, along with the volume of production, including chicken eggs. The data for this special release were meticulously gathered by the Philippine Statistics Authority (PSA) through two primary surveys: (1) The Backyard Livestock and Poultry Survey (BLPS), conducted on a quarterly basis, covers a comprehensive sample size of 200 households.

This survey serves to capture the dynamics of livestock and poultry inventory at the household level; (2) The Commercial Livestock and Poultry Survey (CLPS), also administered quarterly, encompasses a broader scope. It involves data collection from various sectors, including swine farms and layer farms, all as of Fourth Quarter 2023 and Fourth Quarter 2024

DEFINITION OF TERMS

- Livestock – farm animals kept or raised for consumption, work or leisure. In general, poultry is separated as a distinct group of farm animals. For purposes of census and surveys, livestock covers only those that are tended and raised by an operator.

It is commonly defined as domesticated animals raised in an agricultural setting to produce labor and commodities such as meat, eggs, milk, fur, leather, and wool. Livestock in this publication includes hog, cattle, goat and carabao.

- Poultry – a collective term for all domesticated avian for the purpose of food consumption or, the carcass of such avian dressed/processed for human consumption. It can be defined as domestic fowls raised to produce meat or eggs. Poultry in this publication includes chicken and duck.
- Animal Inventory (also, Animal Population) – the number of domesticated animals in head present in the farm at specific reference date.
- Dressing – the progressive separation on the dressing floor of food animal into carcass, offal and inedible by- products.
- Slaughter – refers to butchering of animal for the purpose of human consumption.
- Slaughterhouse/Dressing Plant – the premises that are approved and registered by a controlling authority in which food animals/birds are slaughtered and dressed for human consumption.
